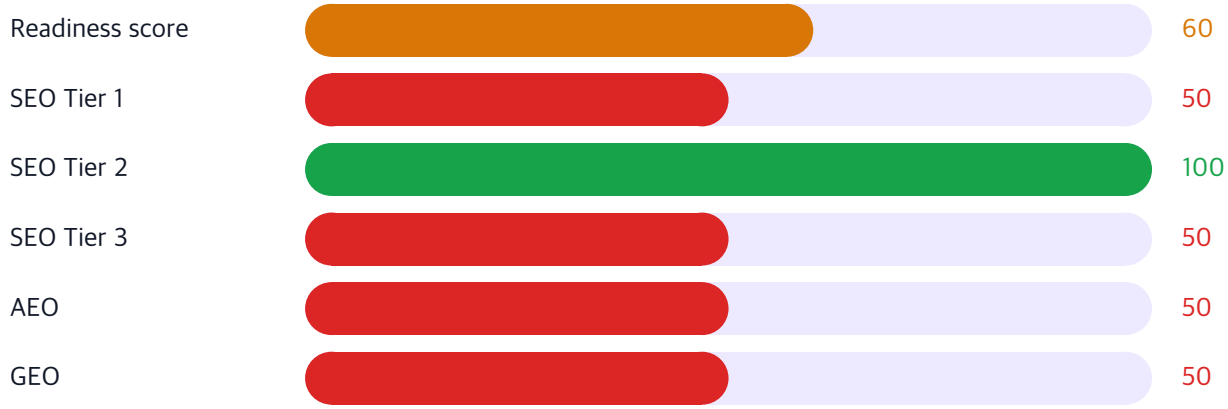
Needs work · Scored coverage 100%

Score graph

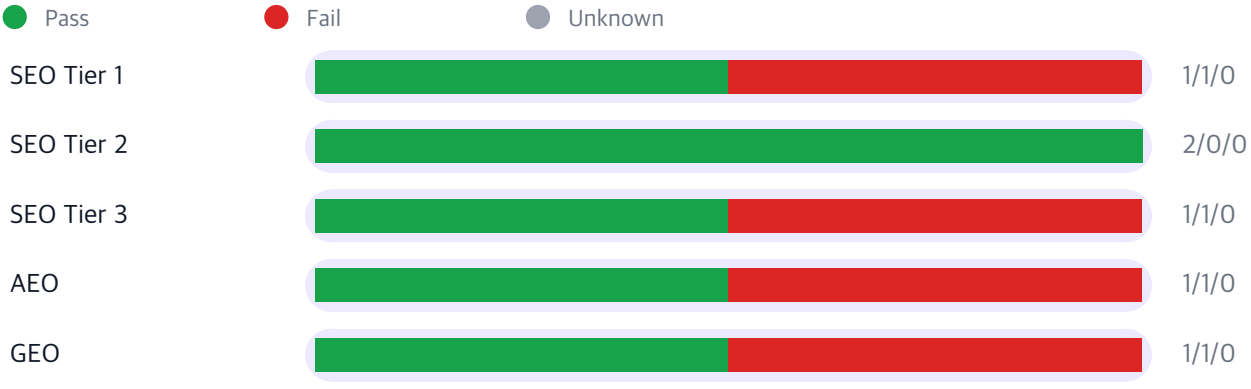


Example report. After a real audit, replace this PDF and copy the script scores into the description and keywords.

Layer scores

SEO Tier 1 · 50/100 · 1 pass · 1 fail · 0 unknown
SEO Tier 2 · 100/100 · 2 pass · 0 fail · 0 unknown
SEO Tier 3 · 50/100 · 1 pass · 1 fail · 0 unknown
AEO · 50/100 · 1 pass · 1 fail · 0 unknown
GEO · 50/100 · 1 pass · 1 fail · 0 unknown

Pass, fail, and unknown



What to improve and how

1. [SEO Tier 1] One unique title (high)
   What: Set a unique title that names the product.
   How: Put the title in the document head and verify it in the rendered HTML.
   Evidence: Example: the title element is empty.

2. [SEO Tier 3] Entity names agree (medium)
   What: Use one company name everywhere.
   How: Pick the canonical name and replace the mismatched footer string.
   Evidence: Example: the company name differs between the title and the footer.
3. [AEO] Question-led section answers on the page (medium)
   What: Answer the pricing question in that section.
   How: Open the section with the pricing model, then the proof.
   Evidence: Example: the pricing question ends with contact us.
4. [GEO] Citation crawlers match the customer choice (high)
   What: Allow PerplexityBot.
   How: Remove the Disallow for PerplexityBot in robots.txt and fetch the file again.
   Evidence: Example: robots.txt blocks PerplexityBot and the customer wants that citation.

Needs more evidence

None.

30 / 60 / 90 days

0-30 days: Replace this line with the first fix
31-60 days: None.
61-90 days: None.
